

Muhammad Kashif

Front-End Web Developer

As a front-end developer, I bring deep expertise in HTML, CSS, JS, and React, with a portfolio of several professional projects exclusively in React, showcasing modern, responsive, and dynamic user interfaces. My foundational understanding of web servers, analytics, and SEO ensures that user experience is always at the forefront of my designs. My proficiency extends to the WordPress CMS, where I effectively integrate content management with advanced front-end capabilities. A collaborative spirit defines my work approach, allowing me to forge strong relationships with team members, and I am known for delivering exceptional results even under high-pressure situations.

WORK EXPERIENCE

Chrome Extension Developer Intern - JS BrainyBitz

11/2023 - 01/2024

Achievements/Tasks

- Developed a diverse range of Chrome extensions including a Timer tool for enhanced productivity, a Weather extension providing real-time updates, and a Music extension for seamless in-browser music playback
- Utilized JavaScript, HTML, and CSS to build robust and responsive Chrome extensions, ensuring compatibility with various browsers and optimal user experience
- Collaborated with a cross-functional team to gather requirements, plan features, and implement functionalities that meet user needs and preferences

Front-End Developer Intern Interns Pakistan

07/2023 - 09/2023

Achievements/Tasks

- Spearheaded multiple web projects, showcasing versatility and adaptability to different web development needs
- Created an array of basic web elements, honing in on both aesthetics and functionality to ensure seamless integration into larger projects
- Designed and developed a responsive portfolio website, effectively demonstrating my front-end capabilities and design sensibilities
- Took initiative in learning new tools and techniques beyond project requirements, demonstrating commitment to personal and professional growth

PERSONAL PROJECTS

Ecommerce Website - React

- Developed a responsive e-commerce website using React.js and Redux, featuring user authentication, product catalog, shopping cart functionality
- Implemented Firebase for user authentication and real-time data synchronization, ensuring seamless user experiences and enhanced security measures
- Utilized React Router for client-side routing and optimized performance through code splitting and lazy loading techniques, resulting in improved loading times and overall user satisfaction

Portfolio Website - React

- Developed a dynamic and responsive portfolio site using React, effectively showcasing personal achievements, skills, and project highlights
- Leveraged React's component architecture to create modular and maintainable code, resulting in an easily updatable platform
- Integrated sleek animations and design elements, ensuring a modern and engaging user experience

To-Do-List App

- Built a functional to-do-list application, assisting users in organizing tasks and tracking productivity
- Employed responsive design principles, ensuring compatibility across various device types

Color Generator App

- Designed a color generator application, enabling users to discover and create unique color palettes using HTML, CSS, and JS
